INFORME SOBRE LA COMPRA DE PRUEBAS DE COVID-19

Compras del Gobierno de Honduras

El Gobierno hondureño realizó la compra de kits de prueba de COVID-19 a la Corporación Bioneer (proveedor coreano). Este pedido se compone de 250,000 kits de prueba del modelo COVID-19 SCV-2122, por un costo total de USD 1,875,000.00, que resumimos a continuación:

Proveedor	País de origen	Cantidad ordenada	Marca	Modelo	Costo total	Costo promedio por unidad	Descripción/contenido de Producto
Corporación Bioneer	Korean division	250,000	BIONEER	SCV-2122	\$1,875,000.00	\$7.50	Prueba en tiempo real. Cada kit contiene: solución primaria (1 tubo 1000ul), solución de enzimas (1 tubo 500ul), mezcla de oligo 1 (1 tubo 250ul), mezcla de oligo 2 (1 tubo 250ul), control positivo (1 tubo 150ul)

Los pedidos se entregarán en diferentes fechas, como se detalla a continuación:

Proveedor	Bioneer Corporation
Fecha de entrega estimada	10 o 15 de abril, 2020 - 100,000 pruebas
	17 de abril, 2020 - 100,000 pruebas
	24 de abril, 2020 - 50,000 pruebas

Proceso de determinación de la razonabilidad de las compras

Para determinar si las compras realizadas por parte del Gobierno hondureño son razonables en relación con los equipos de prueba COVID-19, el Dr. Mark Veenstra recopiló cotizaciones de empresas y proveedores utilizados por los Estados Unidos, con el objetivo de comparar los precios generales, la calidad del equipo y la fecha estimada de entrega.

**PRECIO
COMPETITIVO,
DISPONIBILIDAD Y
CALIDAD TÉCNICA**

**EQUIPO
EE. UU.**

El Dr. Veenstra contactó con varios representantes de esas empresas en los Estados Unidos e investigó a las empresas y proveedores fuera de los Estados Unidos, para indagar los precios y las fechas de entrega estimados.

Nombre	Compañía	Ubicación	Contacto	Respuesta
Representante de la división en EE. UU.	Bioneer	EE. UU.	Llamada telefónica	Llamada telefónica

Resultados

Calidad:

- Los kits no están aprobados por la FDA. Hace dos semanas, este kit de prueba fue certificado por la Unión Europea, comparable a la aprobación de la FDA en los EE. UU.¹
- El kit de prueba Bioneer es una prueba en tiempo real, que proporciona resultados rápidos entre 5 y 15 minutos.² Estos equipos no incluyen los hisopos o contenedores de recogida de esputo, que deben adquirirse por separado.

Precios:

Así mismo el Dr. Veenstra se comunicó con un representante de Bioneer, la empresa a la que el Gobierno hondureño compró los 250,000 kits de prueba, y revela lo siguiente:

- Se compraron los kits de prueba por USD 7.50 por kit, a la división de Bioneer en Corea. Si se compran a la división de EE. UU., cada kit costaría 14 dólares.
- Datos de Medicare (sistema de salud pública en EE. UU.) muestran que las pruebas de COVID-19 desarrolladas por el CDC costarían alrededor de USD 36, mientras que las pruebas comerciales cuestan alrededor de USD 52.³

Compañía	Marca	Precio	Disponibilidad
Bioneer		USD 7.50 por unidad	abril 2020
Everlywell ⁴	Kit de recolección en casa con diagnóstico de telesalud para COVID-19	USD 139.00	23 de marzo 2020
Medbelle (hospital digital en el Reino Unido) ⁵	Pruebas de COVID-19	225 euros o USD 244.43	No indicado

1 Apéndice VI, Pruebas Bioneer COVID-19 Certificación CE

2 Apéndice III, Pruebas de COVID-19 en tiempo real

3 Apéndice IV, Precios de pruebas del CDC vs pruebas comerciales

4 Apéndice I, Pruebas de COVID-19 - Everlywell

5 Apéndice II, Pruebas de COVID-19 - Medbelle

Conclusiones

Basándose en la investigación realizada, el Dr. Veenstra pudo determinar que, en términos generales, la compra realizada por parte del Gobierno hondureño de los kits de pruebas de COVID-19 es razonable, considerando el precio, la calidad y la disponibilidad. También detalla lo siguiente:

- 1) *Precio.* Actualmente hay al menos 22 compañías en los Estados Unidos tratando de hacer nuevos kits de prueba de COVID-19, ya que no existen suficientes kits de prueba disponibles para los pacientes en los Estados Unidos.⁶
Considerando que estos kits de prueba Bioneer costarían 14 dólares en los EE. UU. y el Gobierno hondureño está pagando 7.50 dólares por kit, el Dr. Veenstra considera que el precio es justo y razonable.
- 2) *Calidad.* A pesar que estos kits de prueba COVID-19 no están aprobados por la FDA en los Estados Unidos, para pruebas en pacientes en este momento; sí fueron certificados por la CE en la Unión Europea para pruebas en pacientes, lo que es comparable a la aprobación de la FDA. El Dr. Veenstra consideró esto como un signo de buena calidad.
- 3) *Disponibilidad.* Si el Gobierno hondureño quisiera hacer un nuevo pedido de equipos de prueba diferentes, tendría que esperar un plazo de tiempo mayor, ya que actualmente todos los países están en espera de adquirir los mismos; lo que daría lugar a una fecha de entrega posterior y no ayuda a frenar la propagación de la pandemia.

What You Should Know:

- Everlywell announces that an at-home collection kit with telehealth diagnosis for COVID-19 will be available to consumers starting Monday, March 23 for \$139.
- The initial offering of 30,000 collection kits will significantly impact total coronavirus testing capacity in the United States; free telehealth consults are included for those with positive results.
- By working with multiple labs to scale infrastructure, the company plans to have testing and diagnosis capacity for a quarter of a million people weekly.

By working with multiple labs to scale infrastructure, Everlywell plans to have testing and diagnosis capacity for a quarter of a million people weekly.

RELATED: UPDATED Coronavirus tracker: Insurer, provider and pharma groups send demands to WH; Trump signs stimulus package

All of Everlywell's laboratory partners conducting COVID-19 testing are complying with FDA's Emergency Use Authorization for COVID-19 testing.

The test will be available for \$135 at no profit to Everlywell, and will be covered by participating HSA and FSA providers.

Meanwhile, women's and sexual health-focused telehealth startup Nurx **said** it is developing its own mail-in coronavirus test in partnership with service provider Molecular Testing Labs.

"Allowing people to take a COVID-19 test remotely can be a valuable strategy for containing the virus because it decreases the risk of exposure for both patients and in-person healthcare providers, while also decreasing the strain on brick-and-mortar healthcare services," the company said in a blog post.

Nurx said it will focus its testing efforts on people who have had direct exposure to COVID-19 and/or those who are experiencing symptoms.

TOPICS MAIN MENU

Asia Pacific Europe/UK Global Edition

Credit: Medbelle

Digital hospital Medbelle has announced it will be selling COVID-19 test kits to private patients at cost in an attempt to aid the NHS in its efforts to better understand the virus and to expand testing capabilities in the UK.

The kits cost £225 each, inclusive of laboratory, packaging and advisor fees. Purchases are limited to two per household to control demand, but the organisation has an option for customers to "sponsor" up to 10 tests, which will then be distributed to vulnerable individuals or key workers free of charge.

Medbelle is encouraging those in need to apply for these free tests.

The kit uses the Rapid Blot-Dot technique to detect coronavirus positive cases within 15 minutes. The technique looks for antibodies created in the body in response to the virus infection.

According to the Gano Shasthaya Kendra, the kit will cost approximately BDT250-300.

The standard method of diagnosis of coronavirus is by reverse transcription-polymerase chain reaction (rRT-PCR), which uses sequencing from a nasopharyngeal swab or sputum sample.

Meanwhile, the country reported its first coronavirus death this week. The total positive cases of the disease stand at 20, while three people have recovered.

Bangladesh Government has adopted strong measures to stop the spread of Covid-19 in the country.

The government has closed down all schools and banned mass gatherings. Travel bans have been imposed in all the popular tourist destinations.

CCN

Full-scale manufacturing will begin a few weeks before we release it on the market. We want to make it available to everyone.

The price of the COVID-19 tests is about \$36 for the tests that the Centers for Disease Control and Prevention has developed. Commercial tests cost roughly \$52.

MAC Jurisdiction (J)	MAC States/Territories	U0001 Test Price	U0002 Test Price
J6 - National Government Services (NGS)	Illinois, Minnesota, Wisconsin	\$35.91	\$51.31
JK - National Government Services (NGS)	Connecticut, New York, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont	\$35.91	\$51.31
JH - Novitas Solutions	Arkansas, Colorado, New Mexico, Oklahoma, Texas, Louisiana, Mississippi	\$35.92	\$51.33
JL - Novitas Solutions	Delaware, District of Columbia, Maryland, New Jersey, Pennsylvania; Part B services include Arlington and Fairfax counties in VA, and the city of Alexandria, VA	\$35.92	\$51.33
JN - First Coast Service Options (FCSO)	Florida, Puerto Rico, U.S. Virgin Islands	\$35.92	\$51.33
JJ - Palmetto Government Benefits Administrators (PGBA)	Alabama, Georgia, Tennessee	\$35.91	\$51.31

Coronavirus tests developed by the CDC cost around \$36 while commercial ones will set you back by about \$52 | Source: [Medicare](#)

Additionally, testing using the Mologic diagnostic kit will not require specialized training:
